

# Contents

0.1	Abstract . . . . .	3
	Contents . . . . .	5
<b>1</b>	<b>Introduction</b>	<b>9</b>
1.1	About Membrane Computing . . . . .	9
1.2	About the Topic of This Thesis . . . . .	10
1.3	About the Structure of This Thesis . . . . .	11
<b>2</b>	<b>Prerequisites</b>	<b>13</b>
2.1	Basic Prerequisites . . . . .	13
2.1.1	Set Theory and Algebra . . . . .	13
2.1.2	Languages . . . . .	14
2.2	Grammar Prerequisites . . . . .	15
2.2.1	Grammars . . . . .	15
2.2.2	Programmed Grammars . . . . .	16
2.2.3	Matrix Grammars . . . . .	18
2.2.4	Lindenmayer Systems . . . . .	18
2.3	Automata and Machines Prerequisites . . . . .	19
2.3.1	Finite Automata and Transducers. PDAs . . . . .	19
2.3.2	Turing Machines. LBAs . . . . .	20
2.3.3	Counter Automata . . . . .	21
2.3.4	Conflicting Counters . . . . .	22
2.3.5	Partially Blind Counter Automata . . . . .	23
2.3.6	Register Machines . . . . .	23
<b>3</b>	<b>Introduction to P Systems</b>	<b>27</b>
3.1	P Systems Prerequisites . . . . .	27
3.1.1	Basic Definitions . . . . .	27
3.1.2	Transitional P Systems . . . . .	28

3.1.3	Basic Variants and Additional Features . . . . .	29
3.1.4	Formal Description . . . . .	30
3.1.5	Purely Communicative Systems . . . . .	30
3.1.6	Evolution–Communication P Systems . . . . .	31
3.1.7	Tissue P Systems . . . . .	31
3.1.8	Further Models . . . . .	32
3.2	Computing with P Systems . . . . .	32
3.2.1	Generating . . . . .	33
3.2.2	Accepting . . . . .	33
3.2.3	Processing . . . . .	33
3.2.4	Deciding . . . . .	34
3.3	Properties . . . . .	34
3.3.1	Decidability, Completeness, Universality . . . . .	34
3.3.2	Determinism and Confluence . . . . .	35
3.3.3	Uniform, Semi-uniform Families . . . . .	36
3.4	Maximal Parallelism. Simulator . . . . .	37
3.4.1	Introduction . . . . .	38
3.4.2	Maximally Parallel Multiset Rewriting . . . . .	39
3.4.3	Vector Representation. Simplex . . . . .	41
3.4.4	Solutions. Maximality. Optimization . . . . .	42
3.4.5	Summary . . . . .	44
<b>4</b>	<b>Evolution–Communication</b> . . . . .	<b>45</b>
4.1	Introduction . . . . .	45
4.2	Definitions . . . . .	47
4.3	Universality . . . . .	48
4.3.1	Symport / Antiport of Weight One . . . . .	48
4.3.2	Symport of Weight Two . . . . .	51
4.4	EC P Automata: Accepting Languages . . . . .	52
4.5	Infinite Environment . . . . .	55
4.6	Time-Freeness . . . . .	56
4.7	Determinism . . . . .	58
4.7.1	Symport / Antiport of Weight One . . . . .	58
4.7.2	Symport of Weight One . . . . .	61
4.8	Proton Pumping . . . . .	62
4.9	One Proton . . . . .	64
4.9.1	Symport / Antiport of Weight One . . . . .	64
4.9.2	Symport of Weight Two . . . . .	68

4.10	Concluding Remarks . . . . .	72
<b>5</b>	<b>Symport / Antiport of Small Weight</b>	<b>75</b>
5.1	Introduction . . . . .	75
5.2	Definitions . . . . .	76
5.2.1	P Systems with Symport / Antiport Rules . . . . .	76
5.2.2	Tissue P Systems with Symport / Antiport Rules . . . . .	79
5.3	Descriptive Complexity: A Survey . . . . .	81
5.3.1	Rules Involving More Than Two Objects . . . . .	81
5.3.2	Minimal Cooperation . . . . .	82
5.4	Three Membranes . . . . .	84
5.4.1	Symport / Antiport of Weight One . . . . .	85
5.4.2	Symport of Weight Two . . . . .	91
5.5	Two Cells . . . . .	99
5.5.1	Symport / Antiport of Weight One . . . . .	99
5.5.2	Symport of Weight Two . . . . .	105
5.6	Two Membranes . . . . .	108
5.6.1	Symport / Antiport of Weight One . . . . .	109
5.6.2	Symport of Weight Two . . . . .	115
5.7	One Membrane . . . . .	123
5.7.1	Upper Bound . . . . .	124
5.7.2	Lower Bound . . . . .	124
5.8	Symport of Weight Three . . . . .	126
5.9	Concluding Remarks . . . . .	127
<b>6</b>	<b>Small Number of Objects</b>	<b>129</b>
6.1	Introduction . . . . .	129
6.2	Definitions . . . . .	131
6.3	Membrane Case . . . . .	131
6.3.1	At Least Three Symbols . . . . .	131
6.3.2	At Least Two Symbols and at Least Two Membranes . . . . .	139
6.3.3	One Membrane . . . . .	141
6.3.4	One Symbol . . . . .	143
6.3.5	Summary . . . . .	145
6.4	Tissue Case . . . . .	146
6.4.1	One Symbol . . . . .	147
6.4.2	At Least Two Symbols and at Least Two Cells . . . . .	149
6.4.3	One Cell . . . . .	162

6.4.4	Summary and Open Questions . . . . .	166
6.5	Concluding Remarks . . . . .	168
<b>7</b>	<b>Applications</b>	<b>169</b>
7.1	Sorting . . . . .	169
7.1.1	Introduction . . . . .	169
7.1.2	Sorting Networks . . . . .	172
7.1.3	Sorting Definitions and Notations . . . . .	172
7.1.4	Weak Sorting . . . . .	175
7.1.5	Evolution–Communication Systems . . . . .	175
7.1.6	Summary . . . . .	177
7.2	Solving NP-Complete Problems . . . . .	178
7.2.1	Symport / Antiport and Membrane Division . . . . .	179
7.2.2	Solving SAT . . . . .	180
7.2.3	Summary . . . . .	183
7.3	From Protons to Bi-stable Catalysts . . . . .	184
<b>8</b>	<b>Conclusions and Open Problems</b>	<b>187</b>
8.1	List of Key Notations . . . . .	187
8.2	List of Results . . . . .	188
8.3	List of Conclusions, Open Problems and Research Directions . . . . .	191
8.3.1	Multiset Rewriting . . . . .	191
8.3.2	EC P Systems . . . . .	192
8.3.3	Protons and Bi-stable Catalysts . . . . .	192
8.3.4	Symport / Antiport of Small Weight . . . . .	193
8.3.5	Symport / Antiport with a Small Alphabet . . . . .	194
8.3.6	Solving Particular Problems . . . . .	195
	List of Figures . . . . .	197
	List of Tables . . . . .	199
	Bibliography . . . . .	201
	. . . . .	218
